Subject: Proposed vehicle emissions regs

Please know that I oppose DE adoption of the California auto emission regs. Although concerned about our environment please understand my belief that if adopted these regs would not save our environment but cause a huge increase in the cost of an automobile. Please focus on the coal fired electrical generation that has substantially increase the levels of lead and mercury. I am walking proof of this issue according to my doctor. This has caused inflammation in my body which has caused my body to produce high levels of chlorestol in my body!
If you would like to discuss further please let me know
